James Liu Zixin

Product Owner, Crypto Trading · Singapore

jamesliu@u.nus.edu · linkedin.com/in/james-liu-zx · jamesliuzx.com · github.com/JamesLiuZX · Singapore Citizen

SUMMARY

Product owner for crypto trading at Revolut; before that, trading and derivatives at Crypto.com and Lark at ByteDance. NUS Computer Science graduate who works close to engineering and still builds AI tools.

EXPERIENCE

Revolut — Product Owner (Technical), Crypto Trading 2026 – Present

- Technical product owner for crypto trading in the Revolut app, working closely with engineering.

Crypto.com — Product Manager, Trading & Derivative Products Sep 2025 – 2026

- Product owner for Prediction Markets from 2026: market mechanics, pricing and quotation logic, market operations and rewards, with market launches around the FIFA World Cup and NBA Finals.
- Worked on the Options and Strike Options roadmap, and on derivatives strategy across perpetual futures, tokenized stocks and futures.
- Helped ship an AI trading agent, now in production, that lets users trade in natural language via OpenClaw and bots: defined the tool-calling surface, model context and safety constraints with engineering; contributed code.
- Started on Growth & Onboarding across two engineering teams (welcome bonus, tiered referrals, a guided KYC-to-first-trade flow), and worked with legal and compliance on global KYC and AML.
- Set up AI workflows for the team: Cursor skills for PRDs, clickable prototypes and reporting automated through MCP.

ByteDance — Product Manager, Lark Jul 2024 – Sep 2025

- Ran Lark's partnership with Perplexity AI, from model evaluation and commercial terms to integration.
- Co-led the team building a multimodal AI content platform for SEO: embeddings over the Lark knowledge base, semantic retrieval and the generation workflow.
- Led the revamp of 20 core web pages, and B2B SaaS referral initiatives.

HerbalBath — Co-founder Apr 2021 – Present

- Co-founded and help run a Singapore wellness brand, marketed mostly with AI-generated video ads and UGC.
- Built its website and growth tools: PayNow checkout, a WhatsApp reorder flow and an SEO content engine.

Trendsi — Product Manager Intern, San Francisco Aug 2023 – Jul 2024

- Led development of a product-similarity recommendation engine that lifted cart conversion, and cut payment fraud with Stripe 3D Secure and Radar rules.

Ernst & Young — Software Engineer Intern May – Aug 2023

- Led frontend development of a real-time analytics dashboard for an international enterprise client.

PROJECTS

- **Quorum**: a crypto trading desk where AI agents propose, a risk kernel decides and I approve every order.
- **Kino**: an AI image and video studio running ComfyUI workflows on RunPod GPUs, with an ad studio.

EDUCATION

National University of Singapore — B.Comp. Computer Science, Honours (Distinction) 2021 – 2025

- Specialisations in AI, and Networking & Distributed Systems. NUS Overseas Colleges, Silicon Valley.
- Student mentor for CS2103T Software Engineering after finishing in the top 5% of the cohort.

Stanford University — Graduate coursework, Management Science & Engineering Fall 2023

SKILLS

Product	Discovery, PRDs, experimentation, roadmaps, regulatory work with legal and compliance
AI	LLM agents and tool use, retrieval (RAG), evaluation, AI image and video generation
Technical	Python, SQL, TypeScript, React, Next.js, Java, AWS; Cursor, Claude Code
Languages	English, Mandarin
