Technical product owner for wealth and trading at Revolut; before that, product lead for derivative products at Crypto.com, a 10M+ MAU consumer app, hands-on from prototype to launch. Builds agentic LLM features with engineering (tool calling, retrieval, and safety constraints) and ran an AI model partnership at ByteDance from evaluation through integration. Builds AI agents and tools for trading and multimodal generation on the side.

WORK EXPERIENCE

Product Owner (Technical) | Revolut **Nov 2026 – Present**

- Product owner for wealth and trading in the main Revolut app, working closely with engineering on the trading experience.

Product Manager, Trading & Derivative Products | Crypto.com **Sep 2025 – Nov 2026**

- Owned Prediction Markets on the main app: market mechanics, pricing and quotation logic, market operations, and rewards; grew monthly active users **60%** quarter on quarter with launches around the FIFA World Cup and NBA Finals.
- Worked with engineering on an AI trading agent that lets users place and manage trades in natural language through OpenClaw and third-party bot integrations: the tool-calling surface, model context, and safety constraints; contributed code via PRs.
- Spearheaded the main referral programme and the welcome bonus, lifting new-user trading volume **90%** and **15%** respectively; owned compliance for onboarding, KYC, AML and anti-fraud, and the expansion of trading products into the EEA and additional US states.
- Owned the Options and Strike Options roadmap; designed and automated the team's internal AI workflows (RAG retrieval, multi-agent orchestration, PRD drafting, prototypes on the company domain), cutting turnaround **90%**, built on Claude Code, MCP and the Google Workspace CLI.

AI Product Manager | ByteDance **Jul 2024 – Sep 2025**

- Developed an AI generative content pipeline and fine-tuned frontier models for multimodal generation quality, increasing SEO and leads **30%**; co-led a team of 16.
- Led partnerships, including the Perplexity AI collaboration (model evaluation, commercial negotiation, and technical integration), worth over **$20M** and covering 200,000+ user licenses.
- Redesigned 20+ core high-traffic web pages, lifting lead conversion more than **20%** per page on average; ran a B2B referral campaign. Converted to full time in 2024; Q2 2025 spot bonus.

Co-founder | HerbalBath **Apr 2021 – Present**

- Grew a DTC brand to **S$200K+** annual revenue and **30,000+** customers, running acquisition on AI-generated video ads and UGC alongside lifecycle and referral campaigns.

Product Manager | Trendsi | San Francisco, US **Aug 2023 – Jul 2024**

- Lead PM for 9 projects (teams of 10 to 15) across payments, frontend conversion and SEO at a Series A ($25M) Silicon Valley e-commerce startup: funnel checkout conversion **+25%**, SEO **+30%**, weekly app reviews **+300%**.
- Cut fraudulent transactions **90%** (US$20,000 monthly) through data analysis and Stripe 3D Secure and Radar risk rules.

EDUCATION

National University of Singapore | B.Comp. in Computer Science, Honours (Distinction) **May 2025**

- Specializations: Artificial Intelligence; Networking and Distributed Systems. NUS Overseas College, Silicon Valley; NUS Enterprise $10,000 VIP award; CS2103T Software Engineering student mentor (top 5% of cohort).

Stanford University | Graduate Coursework, Management Science & Engineering (GPA 3.7/4.0) **Jan 2024**

SKILLS

AI & ML Product: Agentic systems (tool calling, context and memory design, safety constraints), LLM applications, RAG & vector search, model evaluation & selection, prompt & context engineering, MCP integrations, recommendation systems, AI model & vendor partnerships

Product: 0-to-1 development, rapid prototyping, roadmaps, PRDs, A/B testing & experimentation, data analysis, growth & retention, go-to-market, user research, OKRs, Agile, cross-functional leadership

Technical: Python, SQL, TypeScript, React, Next.js, Java, AWS, REST APIs | Cursor, Claude Code, Git, Postman, Jira, Figma, Amplitude, Mixpanel
